The Object of Interest

2012

„Scaling Agile @ Spotify“ von H. Kniberg und A. Ivarsson (<https://bit.ly/2PneB7L>)

2012: The Facts

- Approx. 600 (on average, very young) employees
- Strong growth to ensure market dominance
- **“Weighted towards Delivery”**-Matrix

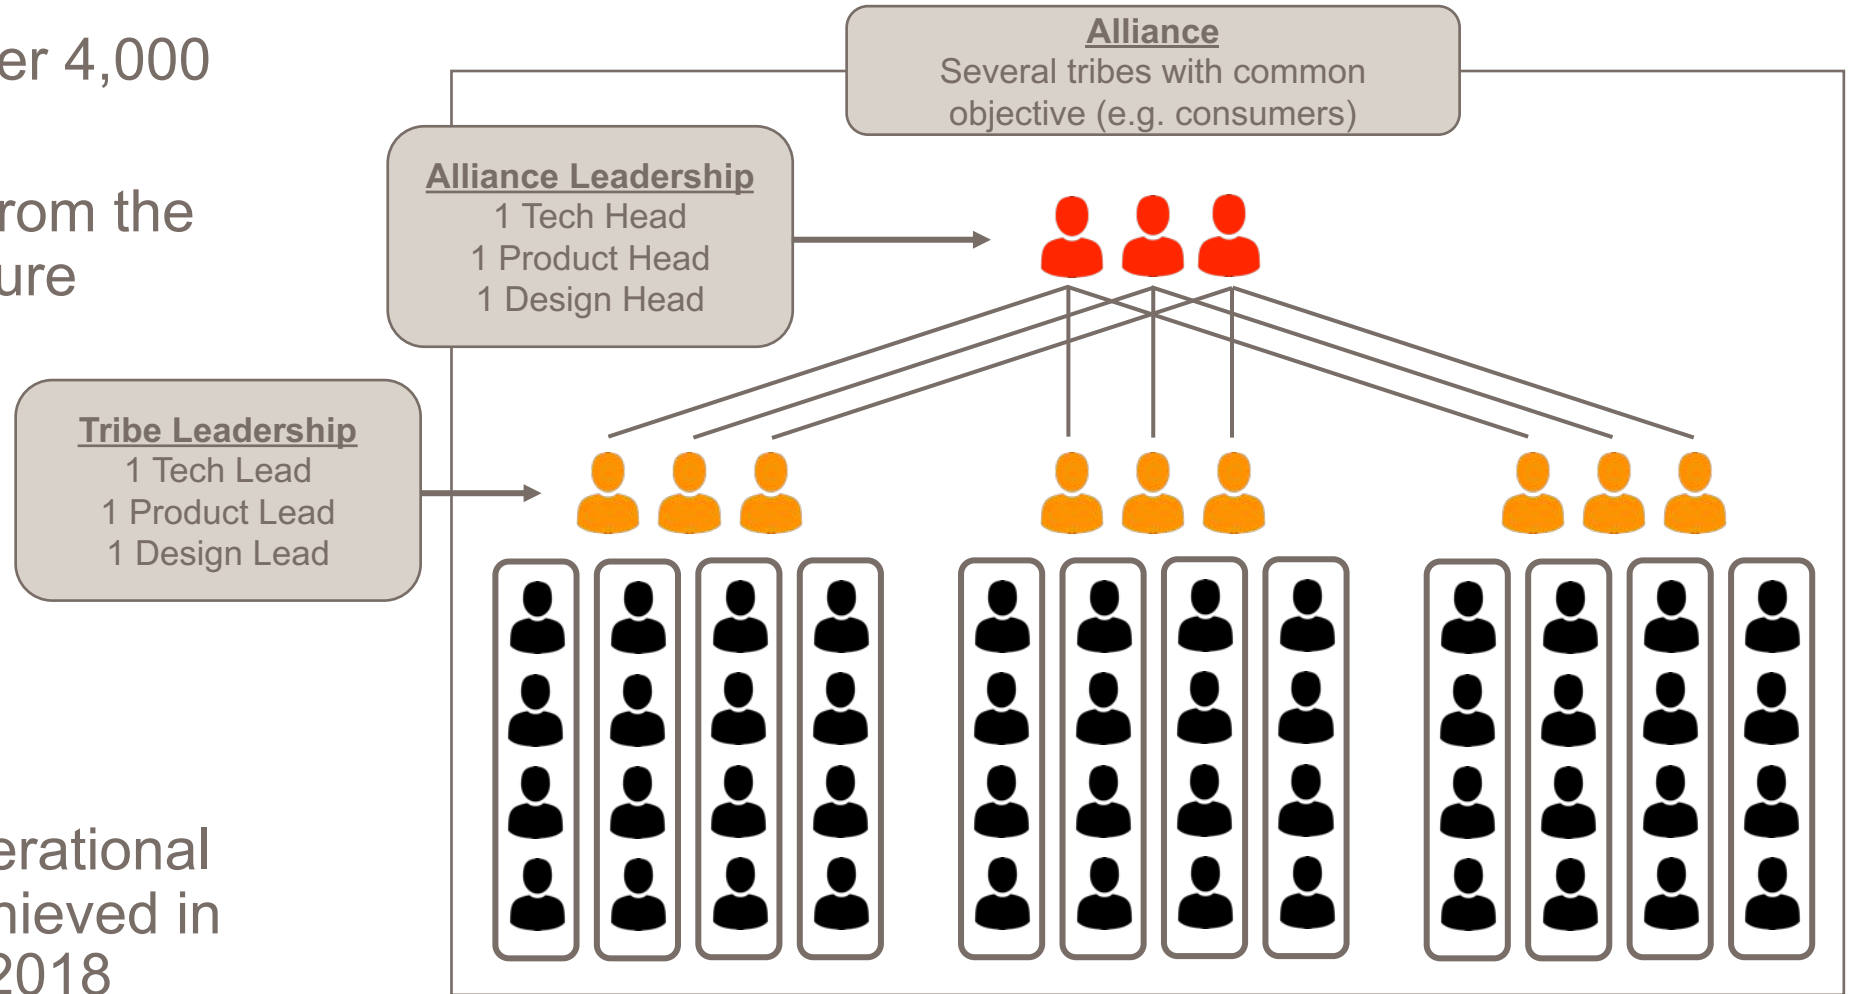

“Disclaimer: *We didn't invent this model. Spotify is (like any good agile company) evolving fast. This article is only a snapshot of our current way of working - a journey in progress, not a journey completed. By the time you read this, things have already changed.*“

Spotify after 2012

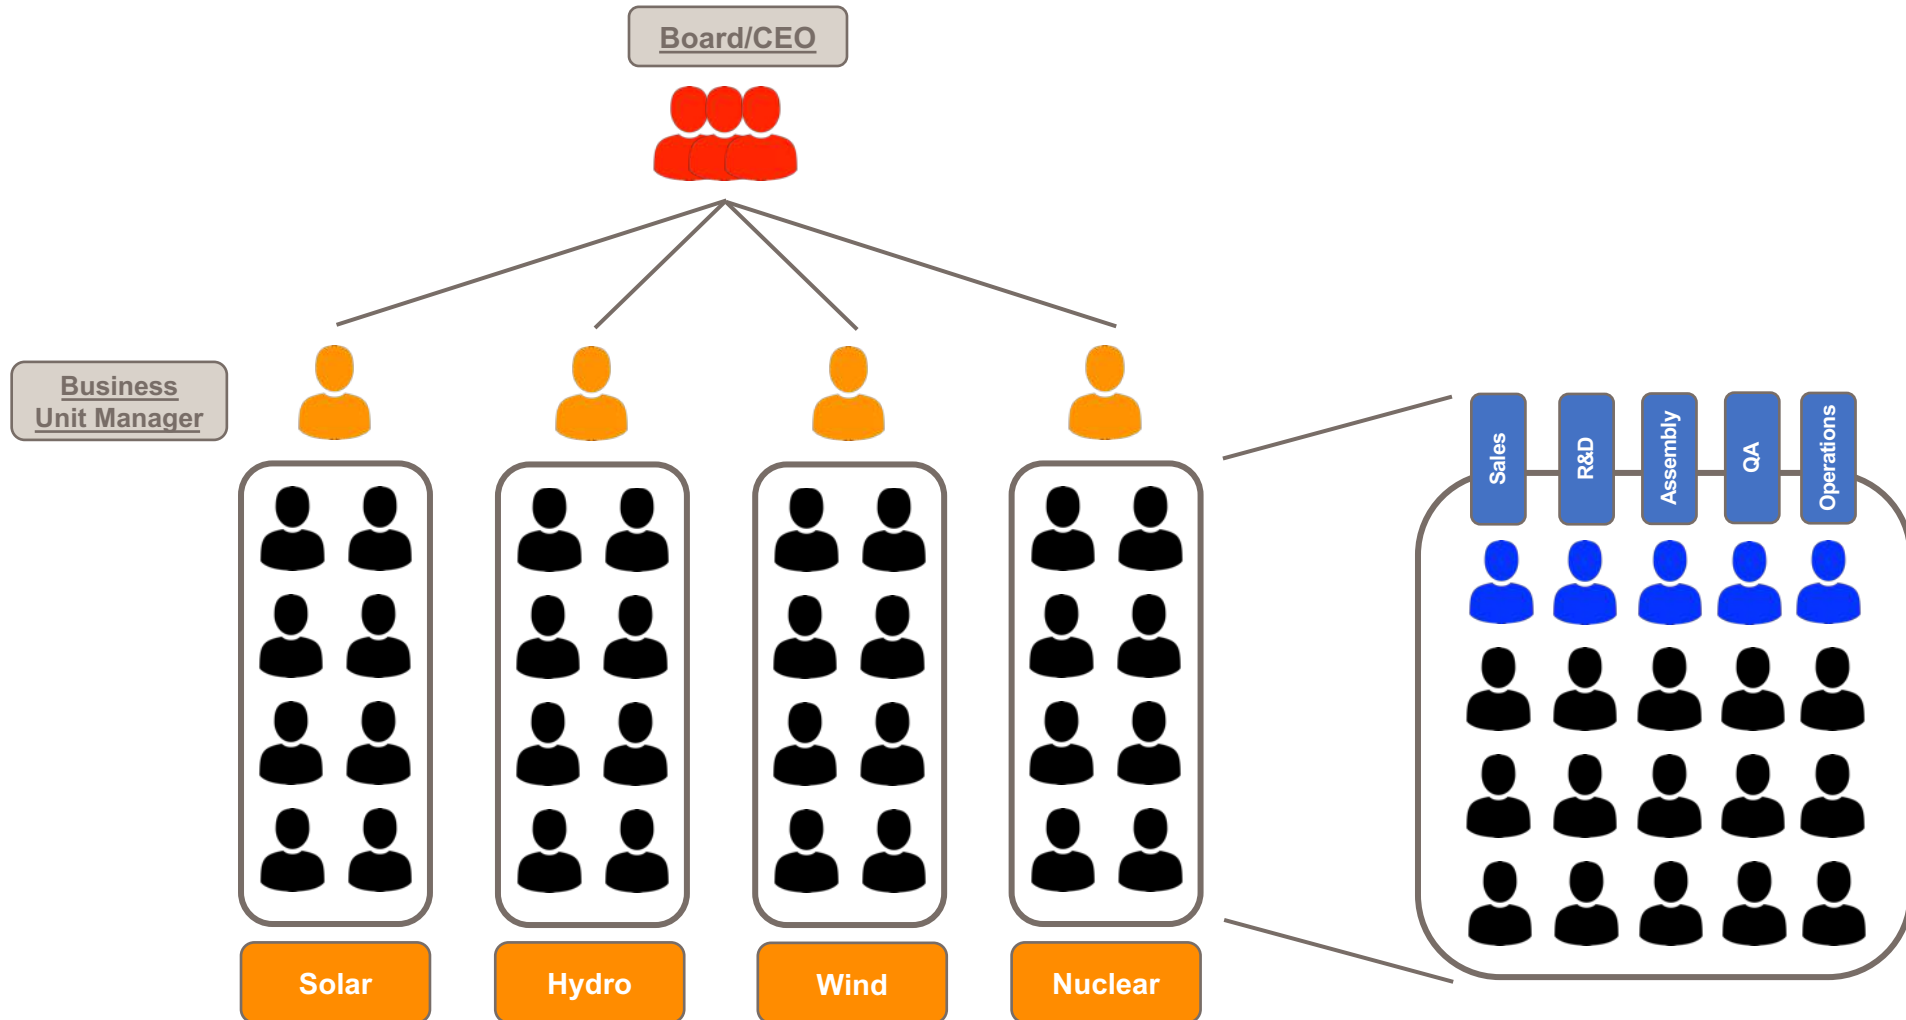

- Growing to over 4,000 employees
- First lessons from the existing structure

First operational profit achieved in Q4/2018

The Challenges of Implementation

1

The organizational cross-section of Tribes

2

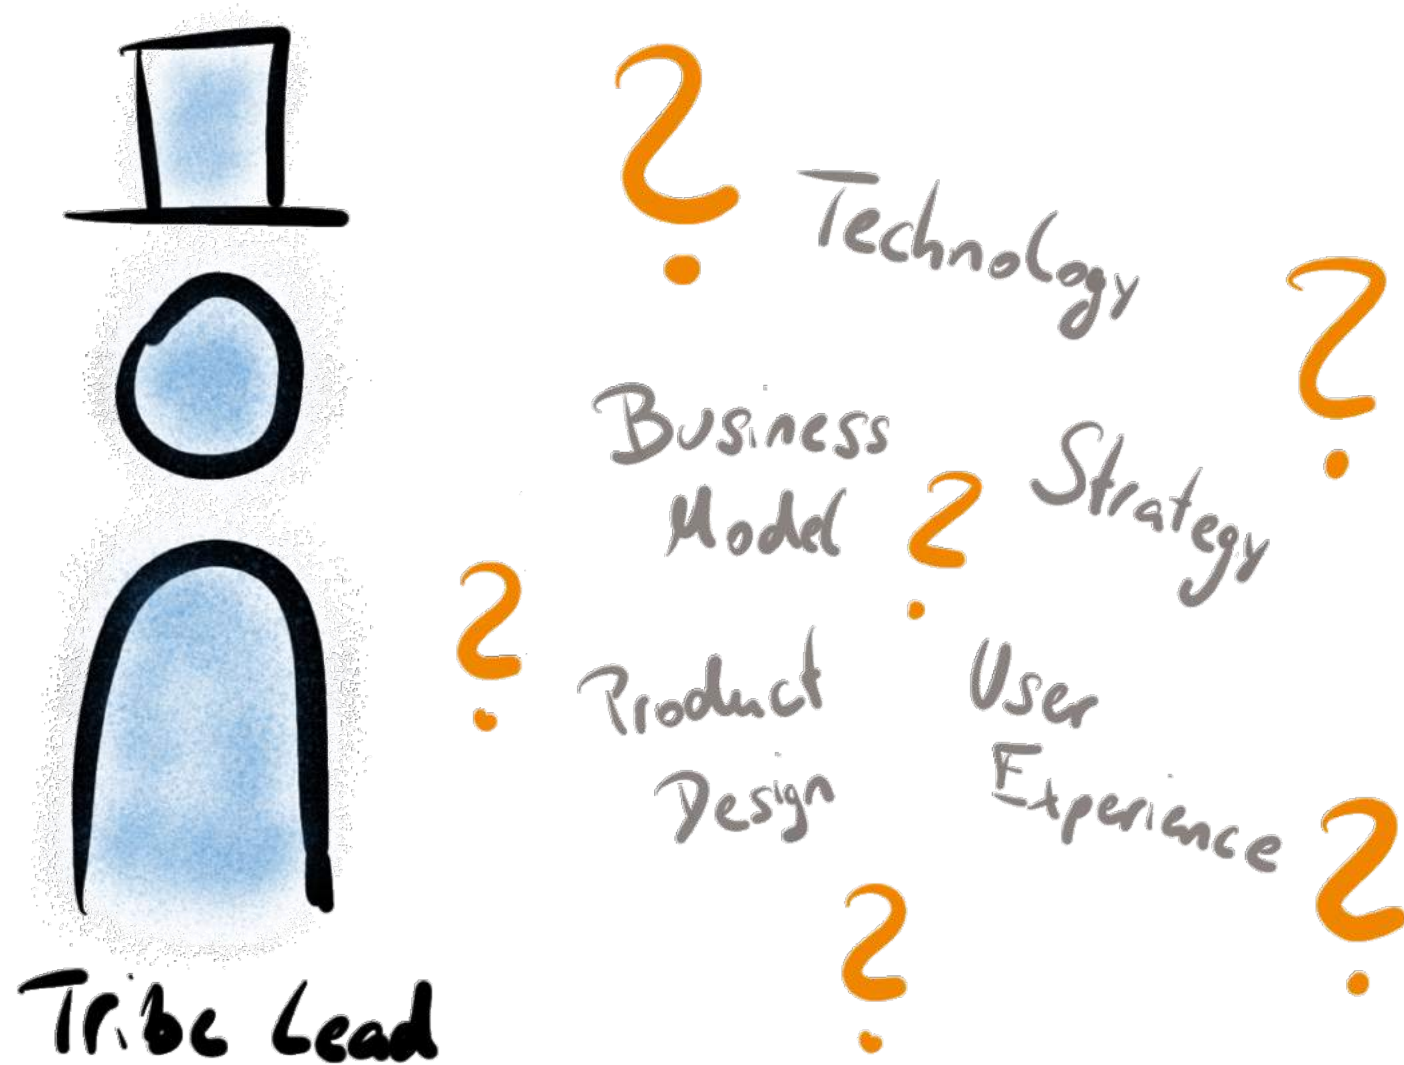

The role of the Product Owners

3

Arranging the Chapter and its Leads

4

Establishing Support units

Dunbar

Example Case:

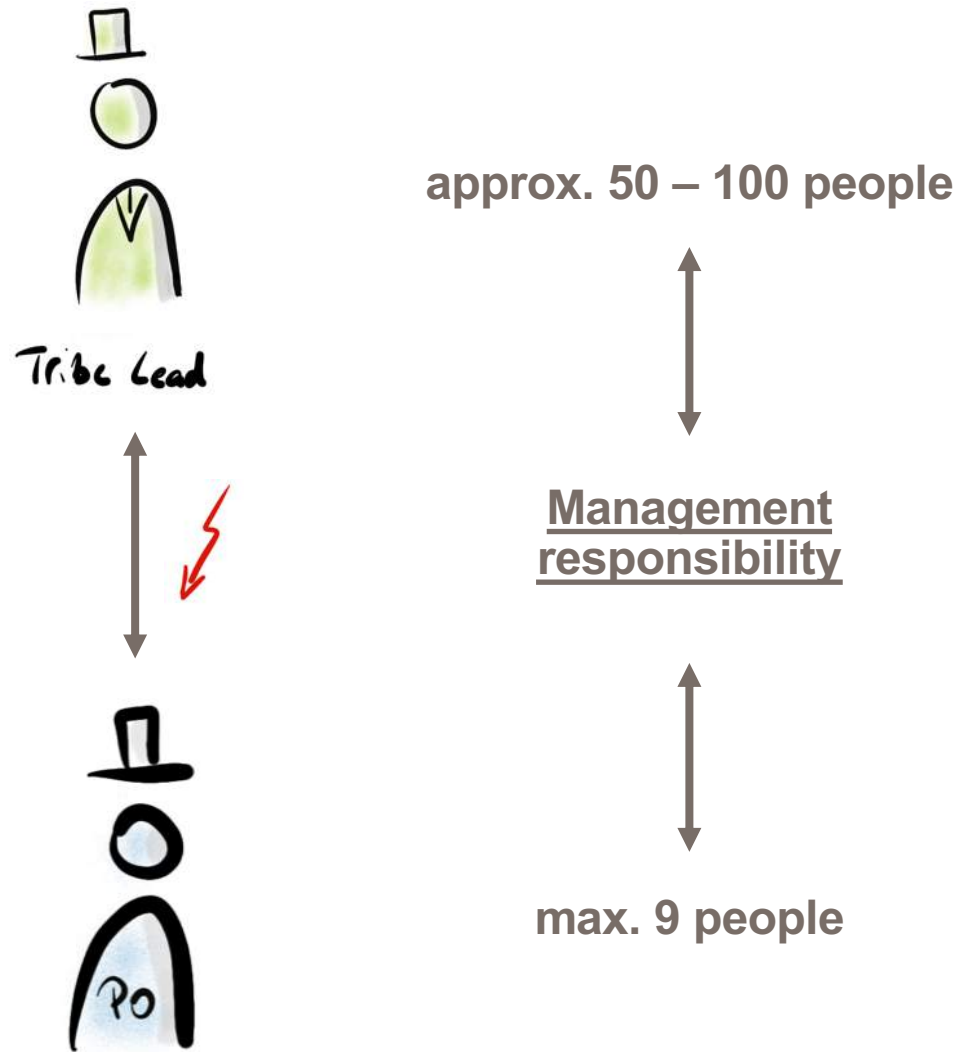

Tribe with 100 Employees
approx. 12-16 Squads with Product Owners
approx. 3 Business Experts per Squad
approx. 4-7 Business Chapters with Chapter Leads

Tribe Lead management span > 20

- Larger gap in strategic work and management span
- “more difficult” to advance on the career ladder

Scaled Product Owner Role

same same but different

Implementing

- “true” 360° feedback processes
- collective salary determination processes

Factors to consider:

- **Chapter size**
- **Necessity** of **strategy work**
- **Necessity** and **effort** for **setting standards**

Yes ✓

Example UX Design Chapter:

- Continued team member development
- Drafting brand presence
- Developing and maintaining the style guide

vs.

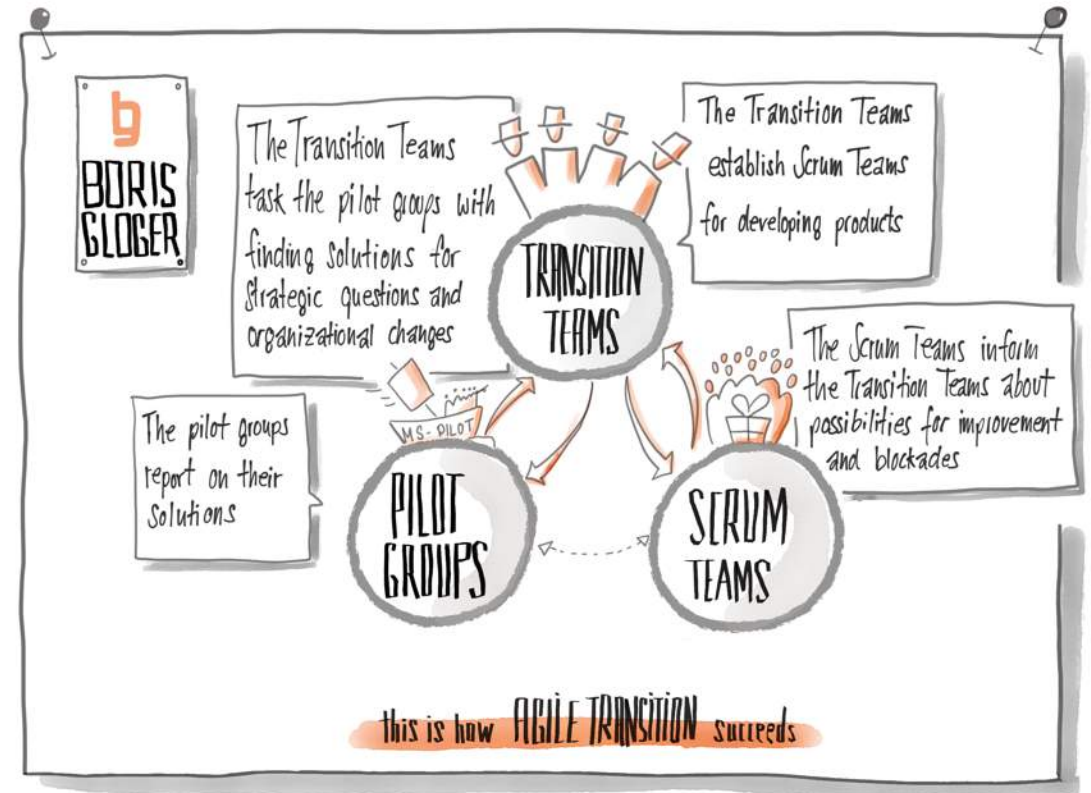

Ultimately, the entire company must become agile!

... but that doesn't mean everyone works with Scrum!

... however, everyone must understand and follow Agile values and principles.

A Huge Breakthrough

The Challenges during Implementation
